Professional Summary

ERPNext and Frappe functional-technical consultant with hands-on experience since **2022** delivering end-to-end implementations for retail, manufacturing, trading, and service organizations in Saudi Arabia. Experienced in requirements gathering, fit-gap analysis, process mapping, configuration, custom development, data migration, user acceptance testing (UAT), training, go-live, and post-go-live support. Builds custom Frappe applications and API/webhook integrations, including Maqdam and n8n, and supports multi-company accounting and ZATCA e-invoicing requirements. Combines ERP consulting with full-time experience in financial accounting, cost control, system administration, and automation.

Professional Experience

ERPNext Implementation & Frappe Development Consultant (Contract, Part-Time)

Ghain - Saudi Arabia | Mar 2025 - Present

- Lead ERPNext client implementations from discovery and fit-gap analysis through configuration, go-live, and post-launch stabilization.
- Facilitate stakeholder workshops, document as-is and to-be processes, and translate requirements into configured solutions and implementation backlogs.
- Develop custom Frappe apps, DocTypes, client/server scripts, approval workflows, reports, dashboards, and print formats using Python and JavaScript.
- Configure roles, permissions, and approval controls to align ERPNext with operational governance and segregation-of-duties requirements.
- Manage data migration, UAT, role-based user training, go-live preparation, and post-go-live support.

Financial Accountant & Cost Controller (Full-Time)

Keffah Al Sharq Group - Saudi Arabia | Feb 2023 - Present

- Manage the full accounting cycle, period-end close, bank reconciliations, AP/AR, employee advances, and project cost control.
- Prepare IFRS-aligned financial and management reports and support VAT and e-invoicing obligations under ZATCA requirements.
- Operate and configure Odoo/ERPNext finance workflows, translating real accounting processes into practical ERP controls and reporting requirements.

ERPNext Implementation & Frappe Development Consultant (Project-Based, Part-Time)

OneBTech (One B Technology) - Saudi Arabia | 2022 - 2025

- Delivered end-to-end ERPNext projects across retail, manufacturing, trading, and service organizations.
- Designed custom Frappe apps, DocTypes, client/server scripts, print formats, reports, and API-based extensions.
- Built API, webhook, and n8n integrations, including ERPNext-Maqdam contact-center workflows for call matching, ticket creation, and customer-record opening.
- Configured multi-company environments, inter-company transactions, consolidated reporting, and controlled migration from Excel, Odoo, and QuickBooks.
- Implemented invoice formats, configurations, and supporting components aligned with applicable ZATCA e-invoicing requirements.
- Administered Linux/VPS environments and Google Workspace, including business email, DNS, MX, SPF, DKIM, and DMARC configuration.
- Delivered role-based training, user guides, SOPs, post-go-live support, and continuous system optimization.

Core Skills

Implementation & Functional Consulting: Discovery, stakeholder workshops, fit-gap analysis, as-is/to-be process mapping, configuration, data migration, UAT, go-live, training, and post-launch support.

ERPNext Modules: Accounting, Buying, Selling, Stock, CRM, HR, and Manufacturing; multi-company accounting, inter-company transactions, approvals, roles, and permissions.

Frappe Development: Custom apps, DocTypes, Python, JavaScript client scripts, server scripts, REST APIs, webhooks, SQL, workflows, print formats, reports, and dashboards.

Integrations & Infrastructure: Maqsam, n8n, Excel, Odoo, QuickBooks, Linux/VPS, Docker, Git, backup, monitoring, Google Workspace, and DNS/email configuration.

Finance & Automation: Full accounting cycle, cost control, IFRS-aligned reporting, internal controls, ZATCA requirements, and LLM-assisted workflows with human review before financial actions.

Selected Projects

ERPNext-Maqsam Contact Center Integration | REST API, Webhooks, Python

Integrated inbound and outbound call events with ERPNext CRM to match calls to contacts, open the relevant customer record for agents, create tickets and tasks, and store call metadata and summaries.

ERPNext AI Integration - Model Context Protocol (MCP) Server

Developed a custom MCP server connecting authorized ERPNext accounting, inventory, and customer data to large language models (LLMs) for natural-language operational queries and faster information retrieval.

Multi-Company ERPNext and KSA E-Invoicing

Configured multi-company structures, inter-company transactions, consolidated financial reporting, controlled data migration, and invoice formats and settings supporting applicable ZATCA e-invoicing requirements.
